

THE *Nitrotini*™

*Charleston's hottest cocktail...
minus 320 degrees.*

COOLED TO -320° FAHRENHEIT, the Nitrotini is Charleston's only cocktail infused with liquid nitrogen. Dramatic, sexy and delicious, the Nitrotini is possibly the coldest and most refreshing cocktail you have ever tasted.

Our expert staff is specially trained in the art, science and safety of the Nitrotini. Curious? Sip on this:

- Liquid nitrogen (LN₂) is just pure nitrogen cooled to -320° Fahrenheit. It is colorless, odorless, tasteless and inert. Our atmosphere, the air that we breathe, consists of 78.08% nitrogen, 20.94% oxygen (O₂) and the remaining 0.08% represents trace gases.
- The cloud that forms above your cocktail is condensed water vapor reacting with the warmer air. Simply wait 1-2 minutes for the cloud and invisible liquid nitrogen to evaporate, and enjoy.
- Nitrotinis are safe to drink. We use the same element used to freeze seafood, fruits and vegetables.
- Nitrotinis can be made only by our specially trained staff in one designated part of the bar.
- Choose from over 25 specialty Nitrotini selections.
- Exclusive to Grill 225. Nitrotinis are not available at the Pavilion Bar.

Refreshing, delicious and one-of-a-kind. Truly Charleston's hottest cocktail...minus 320 degrees.

DISCLAIMER

Liquid nitrogen is served at -320°. It should be given the same respect as fire. Direct contact will cause frostbite or severe burns. Wait 1-2 minutes for the cloud and invisible liquid nitrogen to evaporate. Do not attempt to inhale the water vapor during dissipation, as it may disrupt the balanced ratio of nitrogen to oxygen gas in the air that you breathe. Direct inhalation may cause temporary dizziness.

Nitrotini™ Selections

REFRESHTINI

Hendricks gin, cucumber infused lemonade,
garnished with a cucumber slice

17

225 RUM PUNCH

Myers's Dark rum, orange and pineapple juice,
